Dear Sir:

Regarding Docket 02-33, I am strongly opposed to the proposal to allow ILEC's to exclude CLEC's and IXC's from access to ILEC central office facilities.

I have been a customer of the ILEC SBC and I am currently a customer of local ISP. I much prefer the ISP because they are motivated to serve their customers. I found SBC able to serve but often unwilling to "go the extra mile." I believe it is because consumers in my region have options that SBC is willing to serve at all.

It is essential that fair competition be preserved in local telecommunications markets. Please do not help to create a "DSL monopoly." The consumer must be allowed to access the DSL service provider of their choosing.

Sincerely,

Shawn Neugebauer
